1. We are having difficulty getting quotes from precast concrete companies for the Bowyer Rd culvert. Some are stating that they cannot precast a culvert with a height less than 3 ft. Some can provide a U-channel with a lid, which would function the same as a culvert.

Will NAVFAC accept either a U-channel with a lid, or a cast in place culvert?

After award the Government may consider such a variation in accordance with Section 01 33 00 and the defined procedures for a variation submittal. The bidders are advised to review those requirements if there is intent to pursue such a course of action, and incorporate the results of such review in their proposal as appropriate.
